

REMARKS

Claims 1-34 were previously pending in this application. By this amendment, claims 1-34 are canceled without prejudice or disclaimer, and new claims 35-95 are added. As a result, claims 36-95 are pending for examination with claims 35 and 66 being independent claims. However, new claims 35-56 and 66-86 read on the elected species, while new claims 57-65 and 87-95 read on non-elected species, and may be withdrawn from consideration. Should any of the generic claims in the application be allowed, including independent claims 35 and 66, it is expected that any withdrawn claims depending therefrom will also be allowed. No new matter has been added.

1. Proposed Figure 42 Overcomes Objections to the Drawings

Applicant proposes new Figure 42 that shows a peripheral surface of a wheel having a first and second groove, where the second groove is of a size different from the first groove, as recited in each of claims 47 and 78. The proposed Figure 42 addresses the objection to the drawings under 37 C.F.R. §1.83(a) made in the Office Action with reference to canceled claims 7 and 8. The Examiner is requested to approve proposed new Figure 42.

2. Rejections Under 35 U.S.C. §102 Are Overcome

Newly presented independent claims 35 and 66 each recite, *inter alia*, an elongate shaft with a proximal end, a distal end, and a passageway adapted to deliver the elongated element toward the distal end. Neither U.S. Patent No. 5,489,288 (Buelna) nor U.S. Patent No. 6,187,019 (Stefanchik) disclose a passageway adapted to deliver the elongated element toward the distal end, as recited in each of independent claims 35 and 66. Claims 36-65 and 67-95 depend from independent claims 35 and 66, respectively, and distinguish Buelna and Stefanchik for at least the same reasons. Accordingly, withdrawal of these rejections is respectfully requested.

3. New Claims 35-95 are Supported by the Specification

Applicant respectfully submits that each of the new claims find support throughout the originally filed specification, at least as indicated below.

Claims 35 and 66 find support at least in claims 1, 10, 18, 25, 28, and 29; and figures 1 and 15.
